The Mission
Bridge to Employment aims to increase the number of students who are eligible for and enroll in higher education and pursue a career in the health sector.

How it Works
Four key partners work together to customize a program that meets the academic and experiential needs of the kids who participate.

25 Years of Success
Since its inception, Bridge to Employment has reached thousands of kids worldwide, significantly improving college attendance rates and readiness for healthcare careers.

Creating a Better Tomorrow for Today’s Kids
A quarter-century after Bridge to Employment’s creation, an estimated 50–60% of area teens are on a path in a health-related or science field—and four are currently employed at Johnson & Johnson.

Johnson & Johnson is proud to help prepare future generations of healthcare leaders who have the potential to change our world for the better.
