

Robotics

This session was led by our J&J coaches. Within this session students learned about how robotics are used in various professions. Students were able to gain a hands on approach to robotics by building a robot. At the end of the session students had a race amongst all of their robots.

Career Roundtable

J&J coaches shared their educational background and professional experiences with our BTE students. Students enjoyed learning about different careers within J&J and the different paths each coach had in their educational and career path.

Disney Imagination Campus

Students had the opportunity to participate in two Disney Imagination Campus workshops: Leadership and Teamwork. These special events were used as a way to encourage students to remain engaged in the program all year long. Students loved the opportunity to participate in these events.
